

Honourable Asa Westlund

Committee on the Environment, Public Health and Food Safety

Casaluce Italia 20.08.2006

Honourable Member of European Parliament , I'm a citizen of Italy, president of the Association "La stazione di partenza" and journalist. I have been denouncing serious disasters of the ambient, problems of the criminality, of the alimentary security and security of the citizens for ages. Other Associations have also denounced serious facts that happen on the territory of Agro Aversano and Naples where live millions of people and where are produced alimentary products that arrive even in Your country. We are compelled to apply to You because of a high level of the involvement of the local institutions into the criminal affairs. Therefore we invite You to visit our zone so that You could personally realize gravity of the situation. Your visit won't be an invasion the field because this is European territory and alimentary security and security of the ambient is all European citizen's affair. It will be a great pleasure for us to accompany You through our zone.

Waiting

for Your answer we send You our kind regards.

Antonio Graziano.
